DISPOSITION OF BOARD DOCTORS

At the Board of Health meeting yesterday, Dr. R. J. Wilkinson was appointed Territorial physician for Lihue district and Dr. R. J. McLean for Koloa.

The Board of Medical Examiners reported favorably on Dr. L. L. Moore, who was consequently given a license to practice.

Dr. J. C. Douglass resigned from his position as Territorial physician for Kona. President Cooper stated that when county government went into effect the Kona supervisors had appointed Dr. Deas as county physician. Dr. Douglass, not dreaming that county government would only be a matter of a few days, came to Honolulu. He did not care to return to Kona. He further asked that he be given full salary for January as he had not been dismissed until January 6. This matter was referred to the Attorney General.

John C. Lane was appointed by President Cooper to serve on all standing committees of the Board of which the late S. K. Kane had been a member.

The resignation of Dr. R. P. Myers as a member of the Board of Medical Examiners, was accepted. Dr. Sinclair was appointed to fill the vacancy. It was proposed that Dr. Sinclair fill the positions of both outside and inside physician for the Board as he was at present doing the work of both. The committee on dispensary was instructed to look into the matter.

President Cooper stated that after the overthrow of county government he had notified the Territorial physicians that they were re-appointed. The physicians are as follows:

Kauai—Dr. B. F. Sandow, Waimea; Dr. C. R. McLean, Koloa; Dr. R. J. Wilkinson, Koloa; Dr. F. L. Putman, Kealia and Hanalei.

Oahu—Dr. A. N. Sinclair, Honolulu; Dr. C. A. Davis, Ewa; Dr. Thos. McMillan, Waianae; Dr. H. Wood, Waiakoa; Dr. C. A. Peterson, Koolaukoko and Koolauloa.

Maua, etc.—Dr. A. Mouritz, leeward Molokai; Dr. J. Molony, Lahaina; Dr. J. Weddick, Walluku; Dr. R. H. Dinegar, Kihel and Kula; Dr. W. F. McConkey, Makawao; Dr. R. J. McGottigan, Hana.

Hawaii—Dr. B. D. Bond, North Koloa; Dr. J. Atcherley, South Koloa; Dr. C. B. Greenfield, Hamakua; Dr. Frederick Irwin, North Hilo; Dr. C. L. Stow, Hilo; Dr. R. G. Curtis, Oahu; Dr. J. Holland, Puna; Dr. D. S. McCarthy, Kau. North and South Kona, vacant.

The salary of sanitary inspectors was raised from \$70 to the original figure, namely, \$85 per month.

It was decided to invite Dr. Cofer of the U. S. Marine Hospital Service to become a member of the committee to enlist Federal aid to make possible original scientific investigation at Kahului. Dr. Cooper stated that when he went to the mainland this year he would personally lay the matter before Surgeon General Wyman.

LANTANA BLIGHT ON WINDWARD OAHU

Reports from members of the entomological department were submitted by W. M. Giffard of the committee on entomology at the meeting of the Board of Agriculture in the legislative hall in the Capitol yesterday afternoon. The first related to the lantana blight on the windward side of Oahu and is as follows:

Honolulu, T. H., Jan. 20, 1904.

Gentlemen:—On the 10th inst. at the request of Mr. Giffard I inspected with him the scale-infested lantana on the Kailua road. The infested area was very conspicuous from quite a distance, the foliage having a much darker appearance than that of the healthy bushes, owing to a sooty fungus which is nourished by the honey dew exuded, and on closer inspection the leaves were found to be curled and covered with the insect (Orthesia insigne). Only one patch was observed on the S. W. side of the road, but on the opposite side the infested bushes extend for a long distance along the fence, where I was informed it was originally introduced. Whether the road has proved to be to some extent an isolation belt, as the scarcity of the insect on the S. W. side would suggest, or whether its dispersal there has been checked by the prevailing winds, is a difficult point to decide.

To the casual observer the area of infection appears much greater than is really the case, since large patches of guava, also, have the same dark appearance. This, however, proved on examination to be caused by a mealy-bug (Dactylopius sp.).

No Orthesia scale was found upon guava, even when growing up through badly infested lantana. A more thorough examination, however, would be necessary to decide the absolute immunity of the former plant. Further along the road toward Maunawili a healthy growth of lantana was found to have a few Orthesias, showing that its distribution is by no means limited. The danger of its presence near coffee cannot be estimated, since it is known to attack that plant among others in Ceylon and is found upon various plants in South Africa (Capetown, Natal, Port Elizabeth and E. London), the West Indies (Trinidad, Jamaica and Antigua) and British Guiana, from which locality it is supposed to have originated.

One very practical method of checking the pest, as suggested by Mr. Giffard, would be to cut down and burn the infested patches.

Yours truly,

F. W. TERRY,

Assistant Entomologist.

Professor Perkins communicated the following on the "black blight," reported to the Board by Warden Henry of Oahu Prison, as existing in Thomas Square:

Honolulu, T. H., Jan. 20, 1904.

W. M. Giffard, Esq., Special Committee on Entomology.

Dear Sir:—The "black blight" in Thomas Square is merely the ordinary fungus growth which follows the attack of mealy-bug. It is confined to a few trees only (banyans) which on account of their large size would be very

HOSTETTER'S STOMACH BITTERS NERVOUSNESS

upsets the stomach and prevents the nutritive elements from getting into the blood. The stomach finally rebels against food and the result is dyspepsia. The Bitters will strengthen the nerves and cures dyspepsia, constipation, biliousness, flatulency, also create a hearty appetite, purify the blood and build up the system. Be sure to try it.

HOSTETTER'S STOMACH BITTERS

expensive and difficult to treat. Moreover, as the scale-bug causing this black blight is on practically every bayonet tree in the country and on various other trees, it is sure to return immediately after treatment. It is therefore better to wait the opportunity of securing an efficient natural enemy for this scale-bug. On the whole I may say that Thomas Square is singularly exempt from insect pests and compares most favorably with the average yard or garden about town.

Yours obediently,

R. C. L. PERKINS,

Assistant Superintendent of Entomology.

MOANA HOTEL CONCERT.

The band will play the following selections at a concert to be given at the Moana hotel this evening, beginning at 7:30 o'clock:

Ballad—"Eloa Maka Uluhi"....Heine
Waltz—"Carnevals Secrets"....Fretas
Finale—"Fanfare Militaire"....Asher
"The Star Spangled Banner."

The man who commits suicide takes life too seriously.

Danderine

GREW THIS HAIR

**HERE IS
POSITIVE PROOF**
that the growth of the hair can be influenced for the better.

Even when absolutely healthy to begin with, it can be made to grow much faster and longer than it does normally.

The above photographs of Miss Frances Marie Knowlton show what rare, persistence and a good hair invigorating tonic will do in the way of producing hair. This little girl has had Danderine applied to her hair and scalp regularly ever since she was three months of age, with the result that she now has the longest and most beautiful head of hair ever possessed by a child of her age. Frances Marie is the daughter of Dr. E. W. Knowlton, one of the proprietors of Danderine. The doctor says that her hair is growing much faster than she is, and he is sure it will be long enough to touch the floor when she stands erect by the time she is four years old.

IT ASTONISHES EVERYBODY.

Miss Ella C. Schroeder, who has the most aristocratic patronage of any one of her profession, briefly describes her wonderful success with this great Hair Tonic in the following letter:

THE KNOWLTON DANDERINE CO., 154 Lake St. Chicago.

Gentlemen:—It is with pleasure that I give you testimonials as to the merits of DANDERINE which I am using every day in my practice. I have not had a case where DANDERINE has failed to cure dandruff and falling hair and to start a luxurious growth, even under the most trying conditions. In some cases of long standing, results have been perfectly astonishing to both my patients and myself. I have over a hundred persons whom I am treating regularly, and there is not one but who is enthusiastic over the wonderful work of DANDERINE. At the Chicago Beach Hotel, where I spend a great deal of time I have a large number of clients who are using DANDERINE regularly, with the most delightful results. From my experience with DANDERINE, in several hundred cases, I feel that I cannot recommend it too highly. With sincere wishes for your unbounded success, I remain,

Yours respectfully,

Ella C. Schroeder

Hair Dresser and Specialist, 490 E. 47th St., Chicago.

FREE

DANDERINE does the work that is the reason why there is MORE OF IT USED THAN ALL OTHER HAIR TONICS COMBINED. DANDERINE is absorbed most eagerly by the scalp, and its properties are so invigorating and strengthening that it makes the hair grow unusually thick and long. When applied to the scalp it is just as sure to produce an abundance of long, glossy hair as a fertile soil is to produce vegetation. It is working wonders everywhere. We guarantee that one twenty-five cent bottle of it will do the hair more good than a gallon of any other hair tonic ever made. Be sure you get the genuine, made only by The Knowlton Danderine Co., Chicago, Ill., 25c, 50c, and \$1.00 per bottle. All druggists keep Danderine or will order it for you if you ask them. To show how quickly Danderine acts we will send a large sample free by return mail to anyone who sends this advertisement to the Knowlton Danderine Co., Chicago, with their name and address and ten cents in silver or stamps to pay postage.
